

i2 Overwatch

i2 Overwatch – defense industry solution providing consistent and accurate “Battlespace Object Management” view by collecting and fusing ISR, SIGINT, HUMINT, OSINT, and coalition data. i2 Overwatch has been developed to ensure that this data is presented in a way that is immediately recognisable to NATO members.

i2 Overwatch delivers a single platform for collecting, analyzing, and visualizing mission-critical intelligence. Built to meet the needs of modern military operations, Overwatch empowers analysts and commanders to act on insights faster and with greater clarity—anywhere in the world.

A solution that helps analysts quickly and reliably build and maintain an intelligence picture for enhanced situational awareness and decision-making

Key features:

- Geospatial and operational awareness
 - Real-time interactive maps with NATO-compliant symbology
 - Terrain, weather and satellite views with global coverage
 - Route planning and range analysis support for mission planning
 - Synchronized geospatial and network views for comprehensive battlefield visibility

- Multilingual text exploitation
 - Automatically extract people, places, equipment, and activities from reports
 - Supports multiple languages using advanced natural language processing (NLP)
 - Cross-reference data and uncover sentiment and relationships
- Visual and link analysis
 - Timeline, association, and network views
 - Analyze force structures, patterns of life, and adversary intent
 - Use seeded searches to rapidly scan multiple sources
- Collaborative intelligence sharing
 - Secure, role-based access to centralized database
 - Briefing-ready charts and web-based access
 - Seamless integration with ISR, OSINT, and case management systems

Optimizing the military intelligence

From command directives to field reports, i2 Overwatch accelerates every phase of the intelligence cycle

1. Planning and direction
Define and prioritize operational intelligence needs
2. Collection
Integrate ISR, SIGINT, HUMINT, OSINT, and coalition data
3. Processing and exploitation
Extract key intel with NLP and auto-fusion of sources
4. Analysis and protection
Visualize order of battle, threat networks, and events
5. Dissemination
Deliver mission-ready insights securely across teams

Why choose i2 Overwatch?

- All-in-one solution for intelligence operations
- Fusion of structured and unstructured analysis
- Fully web-enabled and globally deployable
- Proven in mission-critical environments
- Supports rapid, informed decision-making
